

Unwrapping the Gift: The Computer

CSCI3250+3251

Computers and Society + Engineering Practicum

Dr. Chuck-jeे Chau, Dept. of CSE

This lecture is loosely adapted from Chapter 1 of “A Gift of Fire”

香港中文大學
The Chinese University of Hong Kong

Computer and Technology

- Computer technology
 - The **most significant** new technology since the beginning of the Industrial Revolution
- Powerful technology creates **powerful problems**
- Understand and cope with the effects of these issues

The Pace of Change

- 1940s: The first electronic computers
- 1947: Transistor was invented in the Bell Labs
- 1958: **Integrated circuit** was invented
- 1969: ARPANET connects four university computers
- 1970: The first memory chip was unveiled
- 1981: The first IBM personal **computer**
- 1985: Microsoft announces **Windows**
- 1990: Tim Berners-Lee created HTML
- 1998: **Google** was founded
- 1999: Wi-Fi started becoming common
- 2005: **YouTube** was founded
- 2007: Apple released the first **iPhone**
- ...

Change and Unexpected Developments

- New technologies come into reality every day
 - Smartphones and mobile devices
 - Social networking
 - Artificial intelligence
 - Robots and self-driving vehicles
 - Internet of Things
 - Tools for disabled people
 - See: <https://www.youtube.com/watch?v=RNp4OpToAdQ>

Change and Unexpected Developments

- What other examples can you think of?
- Do they bring more convenience or inconvenience?
 - Appreciate the benefits, while acknowledging the drawbacks

Computer and Social Issues

- How to look at these issues?
 - Old problems in a new context
 - Adapting to new technology
 - Resistance from established interests
 - Varied sources of solutions to problems
 - The global reach of the Net
 - Trade-offs and controversy
 - Perfection is a direction, not an option
 - Differences between personal choices, business policies, and law

Ethics and Etiquettes

- Ethics: do the *right* thing
 - To enhance human dignity, peace, happiness, and well-being
- **Discovering** vs **Inventing** Right and Wrong
 - Deontological ethics 義務倫理
 - Utilitarianism 功利主義
 - Natural rights 天賦人權
 - Social contracts 社會契約
- There is no simple answer

calvin and Hobbes

THEN I THOUGHT, LOOK, CHEATING ON ONE LITTLE TEST ISN'T SUCH A BIG DEAL. IT DOESN'T HURT ANYONE.

...BUT THEN I WONDERED IF I WAS JUST RATIONALIZING MY UNWILLINGNESS TO ACCEPT THE CONSEQUENCE OF NOT STUDYING.

Checkpoint Question

A car company offers as an option a system that will ***detect a pedestrian in the path of the car***, warn the driver, and brake the car if the driver does not respond. The option costs US\$2000. If someone buys the car, does the person have an ethical obligation to buy the optional system to protect pedestrians? Why or why not?
